Underground Construction for Children in Need

Charity Association founded by

Tunnel
Service
Group

Please, join the club!

We are a Charity out of the Construction Industry

We, mining, tunneling and drilling professionals work in conditions often associated with life risk, which makes our hearts bigger. When we heard about thousands of families with children suffering because of the ongoing war in Ukraine, we could not stand by and decided to establish this charity.

- The purpose of our charity is to help Ukrainian children and mothers with children.
- Over 450 thousand children caught up in the conflict in Ukraine, and over 254 got injured, and over 160 were killed.

Open heart, open mind

Mothers with children who have just lost their homes, children who have lost their parents do not know where they can go. They need counselling and advice, someone who can direct them to a place with a safe roof over their head. Our staff stays in contact with the children's parents, their guardians and childcare agencies offering them our help, bringing them in contact with officials in Ukraine and in Eastern Europe, with hotel owners, refugee camps, professional bereavement counselors, passenger transportation companies making sure that the suffering ends.

Supporting Children at Vidin

First project: Recreational facility and training base for canoeing sportsmen put at the disposal of Ukrainian refugees with children. UCCN working in close contact with local businessmen and authorities.

Started with 17 families. Now taking care of 27 Ukrainian families in Vidin.

Next projects:

- Contacting as many hotels in Eastern Europe and Western Ukraine as possible to keep a room or two free for our Children and Mothers with Children, informing families where they can go,
- Contacting food supply chains and shoe factories to get food and shoes to the children. Many children wearing winter boots in summer. Our CEO came back to Kiev in slippers after giving her shoes to a teen girl at Vidin.
- Contacting medical facilities all around Europe to provide medical care for the children. Informing refugees where they can get help for their children. Working in close contact with Ukrainian and European authorities.
- Hiring professional bereavement counsellors for the children and their mothers.
